

## FD SPINNING reels

### PLATINUM FD

- Patented parallel line winding through a very slow moving up and down of the spool
- Corrosion resistant graphite body by using strong high molecular nylon
- Metal crash barriers design to protect the body from impacts
- Narrow blade body design for reducing fatigue
- Patented dual-bearings system lends extremely stability
- Computer balanced rotor equalizing system
- Precision machine cut brass pinion gears
- 13 ball bearings + one way clutch anti-reverse system without maddening standstill
- Two colors alu spool with one line holes + graphite spare spool
- CNC handle with rubber knob on sizes 3000/4000 and metal round knob on sizes 5000/6000/7000 and 7500
- Heavy duty solid aluminium anodized bail wire

ITEM N°	MODEL	Ratio	Power	LINE CAPACITY(mt./mm.-yds./lb.)
